## Lake Mendocino Storage Report:

65% of Water  
Supply Capacity  
as of 7/7/09

Lake Mendocino Storage Level

## THIS WATER STORAGE REPORT

is provided by the Sonoma County Water Agency to inform you about water storage trends in Lake Mendocino.

### Water Conservation Tips

- Test your toilets for leaks. Add food coloring to the water in the tank. Wait fifteen minutes (do not flush). If color appears in the bowl, there is a flapper leak. Replace with appropriate flapper and re-test.
- Run only full loads in your dishwasher and clothes washer.
- Learn how to read your water meter. It not only measures the amount of water you use, it also shows if there is a leak in your plumbing.
- Keep pools and hot-tubs covered when not in use to reduce evaporation.
