

RUSSIAN RIVER COUNTY SANITATION DISTRICT UPDATE

ULTRAVIOLET DISINFECTION SYSTEM PROJECT

The Russian River County Sanitation District's new ultraviolet disinfection system (UV Project) is nearly fifty percent complete. The last concrete pour will be in late November, and mechanical equipment and steel canopy structures will be installed by January, with electrical work finishing in February. Performance testing is scheduled to begin in late February. The UV Project will reduce the use of chlorine needed to disinfect our community's wastewater and ensure the treatment plant complies with regulatory permits.

The UV Project is located at the District's treatment plant at 18400 Neeley Road near Guerneville. The \$4 million UV Project is being financed by the State Water Resources Control Board, with a \$2 million loan and a \$2 million grant.

For more information, please contact Brad Sherwood, Sonoma County Water Agency, at 707-547-1927 or visit the District's web page at www.sonomacountywater.org/rrcsd.
