

Information you requested for the Gill Creek Mutual Water Co. is attached. Please note in the form letter to our subscribers dated July 15 we compare 2009 usage to 2008 not 2004. We no longer have the data for individual customers for the 2004 year, but we found that the total usage in 2004 and 2008 were almost the same.

Our master meter readings indicate that as a group we did not quite make the goal for the May-July quarter – 18% reduction not 25%. We are monitoring usage, however, and will be prepared to report again in October. If you have questions, please call at 857 3291.

Metered usage May through July: 2009 – 5132100 gallons, 2004 – 6260600 gallons

Ginny Gill, Manager.
