

# Community Meeting

## Dry Creek Studies Presentations

Wednesday, January 27th  
3:30 – 5:30 p.m.

Dry Creek Vineyard  
3770 Lambert Bridge Rd.

Thank you to the many property owners who allowed the Sonoma County Water Agency and its consultants to access Dry Creek and its tributaries via your property in 2009. Your cooperation meant:

- Biologists were able to monitor Chinook salmon and steelhead in Dry Creek and Grape Creek
- Several thousand feet of habitat and stream banks were restored on Grape Creek
- An inventory and survey of potential habitat enhancement sites (known as the “Dry Creek Current Conditions Report”) was completed by consultants Interfluve, Inc.
- A habitat enhancement pilot project has been identified.

*Please join the Water Agency, Interfluve, and your neighbors for presentations on these projects and to hear about future work.*

To ensure we have enough seating for everyone, please contact Ann DuBay at 707.524.8378 or [ann.dubay@scwa.ca.gov](mailto:ann.dubay@scwa.ca.gov)
