MEMORANDUM

FILE:PROJ/70-12-7 #45 SONOMA VALLEY EFFLUENT
RESERVOIR R5 - NBRW PROGRAM

DATE: January 14, 2011

TO: FILE

FROM: Erik Brown *EB*
Project Manager

**SUBJECT: North Bay Water Reuse Program Sonoma Valley Effluent Reservoir R5 Project -
Presence of Asbestos Cement Pipe**

Some of the existing vineyard irrigation main piping that will be encountered during earthwork activities by the subject Project is believed to be made of asbestos cement pipe (ACP). The extent of the presence of ACP is unknown, but it is anticipated that the main irrigation piping is ACP. The existing lateral irrigation piping is likely plastic, steel or other material.
